

Hiring Manager

Data Science Consulting Firm

Dubai, UAE

8 July 2026

Dear Hiring Manager,

Position: Data Science Consultant

I am writing to express my strong interest in the Data Science Consultant position with your growing consulting team. As a First-Class Honours Computer Science graduate currently pursuing a PG Diploma in Data Science, I offer a unique combination of technical expertise, analytical delivery, and stakeholder communication. During my AI internship at Mach24 Orbitals, I designed and delivered end-to-end data science projects, optimizing machine learning models to achieve a 23% improvement in performance—demonstrating my ability to translate complex data into high-value commercial solutions.

My technical skill set directly matches the requirements of this client-facing role. I am highly proficient in Python and SQL, using pandas, NumPy, and scikit-learn daily for data transformation, quality assurance, and statistical modelling. In my EduFin Investigation project, I developed PySpark and SQL pipelines in Databricks to analyze a 15,000+ record portfolio, resolving a Rs. 12 Crore discrepancy. Furthermore, my hands-on experience with GCP, APIs, MLOps bootcamps, and Docker equips me to work effectively across cloud platforms and deploy scalable analytical solutions.

What excites me most about this opportunity is the chance to combine data science consulting with client interaction. As a Graduate Teaching Assistant, I successfully led workshops for over 120 students, a role that honed my communication skills and my ability to simplify complex technical concepts for non-technical audiences. I am highly motivated to bring this commercial awareness to your team, helping organisations solve complex commercial challenges through bespoke AI and analytics solutions while contributing to the continuous improvement of your products.

I would welcome the opportunity to discuss how my technical expertise in model optimization, dashboard creation, and stakeholder communication can drive value for your consulting clients. Thank you for your time and consideration, and I look forward to discussing my application in an interview.

Best regards,
Siddhartha Shakya
