PROFILE SUMMARY

Analytical and result-oriented Data Science Consultant with experience delivering end-to-end data science and analytics solutions to solve complex business challenges. Proficient in Python, SQL, and machine learning (scikit-learn, pandas, NumPy, APIs), with a proven track record of designing interactive dashboards, optimising model performance, and translating technical insights for stakeholders.

TECHNICAL SKILLS

Languages	Python, SQL
Machine Learning & AI	Machine Learning, Statistical Modelling, Scikit-learn, Pandas, NumPy, Transformers, APIs, NLP
Data & Cloud Engineering	Databricks, Apache Spark, GCP (BigQuery, Earth Engine, Cloud Storage), AWS, ETL/ELT, Data Transformation
DevOps & MLOps	MLOps, Docker, Git, GitHub Actions
Databases	PostgreSQL, MySQL, MongoDB
Analytics & Visualization	Streamlit, Plotly, Seaborn, Interactive Dashboards, Insight Generation

WORK EXPERIENCE

AI Intern <i>Mach24 Orbitals</i>	Oct 2025 – Feb 2026
– Delivered end-to-end data science projects, processing 1,000+ monthly tiles via custom Python pipelines with automated data transformation and quality assurance. – Optimised machine learning models across 450+ test cases, achieving 23% lower RMSE (14.2 vs. 18.5 Mg/ha) with XGBoost over Random Forest baseline. – Created Streamlit dashboards and presented analytical insights to stakeholders, simplifying complex technical concepts into commercial value.	
Graduate Teaching Assistant <i>Herald College Kathmandu</i>	Aug 2024 – Sep 2025
– Instructed 120+ students in workshops on SQL, parallel computing, and big data technologies like Apache Spark, simplifying complex technical concepts. – Designed data transformation labs and ETL assignments, improving student performance scores by 15% through structured feedback.	

PROJECTS

EduFin Data Investigation & Analytics 2026	Project Link
– Engineered Databricks pipelines using SQL and PySpark to process a 15k-student portfolio, resolving a Rs. 12 Crore discrepancy. – Built interactive dashboards and segmented risk drivers to present actionable insights directly to business stakeholders. – Tech Stack: Python, SQL, Databricks, PySpark, Delta Tables, Data Pipelines, Insight Generation	
Geospatial Environmental Monitoring Dashboard 2025	Project Link
– Developed custom Python applications and APIs for satellite imagery ingestion, optimizing backend load times to under 200ms. – Created interactive Streamlit dashboards, translating complex geospatial trends into clear visuals for client-facing presentations. – Tech Stack: Python, Pandas, NumPy, Streamlit, APIs, Docker, GCP	

EDUCATION

PG Diploma in Data Science	Feb 2026 – present
– <i>Manipal Academy of Higher Education</i>	
BSc (Hons) Computer Science	Feb 2022 – Jun 2024
– <i>University of Wolverhampton</i>	
– Honors: First Class	

CERTIFICATIONS

PySpark: Building Data Pipelines	LinkedIn Learning	Certificate
SQL Bootcamp	Udemy	Certificate
MLOps Bootcamp	Udemy	Certificate
