

Hiring Manager

Emirates Airline

Dubai, UAE

3rd August 2026

Dear Hiring Manager,

Position: Technical Product Manager

I am writing to express my strong interest in the Technical Product Manager role at Emirates Airline. As a Computer Science graduate with a First-Class degree currently pursuing a PG Diploma in Data Science, I bring strong technical skills and hands-on experience in data analysis and engineering. I am confident my background makes me a solid fit for your team.

My core technical strengths include Python and SQL, which I apply across the data lifecycle — from data ingestion and cleaning through to analysis and visualization. During my AI internship at Mach24 Orbitals, I built an automated geospatial data pipeline that eliminated manual processing and reduced data acquisition time by 75%. Additionally, my EduFin Investigation project demonstrates my analytical capabilities: I analyzed over 15,000 student loan records using PySpark and SQL to uncover critical patterns and a significant financial discrepancy. These experiences show my ability to deliver data-driven solutions with real business impact.

Work Authorization and Availability: I hold a valid UAE student visa with full work authorization, eliminating any compliance concerns. I am currently pursuing my PG Diploma in the evening batch (classes 7 PM—10 PM), which means I am fully available during standard work hours (9 AM—7 PM). I have successfully balanced professional work with my studies and am available to start immediately.

I am eager to contribute to Emirates Airline's team and excited about the opportunity to grow my skills while delivering quality work. Thank you for considering my application, and I look forward to discussing how I can add value to your organization.

Best regards,
Siddhartha Shakya
